

ACCESSORIES

Hose Adapter for Plug Nipples

WPN 13 TQ WaterProfi Coupling G 1/2" Hose

High-Quality Manufacturing: Made entirely of nickel-plated brass, more eco-friendly and longer-lasting than plastic.

Robust Construction: High strength and wear resistance ensure a long service life.

Lightweight: Despite its solid construction, the coupling remains pleasantly light.

Optimized Handling: Improved sleeve contour and new ball lock system allow effortless one-hand operation.

Hygienic Design: Smooth surfaces prevent dirt accumulation and make cleaning easier.

High Flow Rate: Efficient performance with high flow capacity.

Compatibility: Perfectly fits standard plug profiles as well as the WaterProfi spray nozzle and watering device.

Spray Nozzle with Plug Nipple

WSD-S WaterProfi Spray Nozzle with Plug Nipple

High-Quality Manufacturing: Combination of nickel-plated aluminum (for weight reduction) and durable brass.

Durability: Resistant to impacts and harsh conditions.

Sustainability: Brass is more eco-friendly and fully recyclable compared to plastic fittings.

Leak Protection: An additional sealing ring prevents leaks, even after impacts.

Ergonomic Design: Knurled, non-slip surface ensures secure handling, even when wet.

Compatibility: Perfectly fits the WPN 13 TQ WaterProfi Coupling G 1/2" as well as all standard couplings.

Quick-Connect Adapter DN 9

WPNA WaterProfi Quick-Connect Adapter

Robust: Made of nickel-plated brass, more durable and resistant than plastic.

Lightweight: Despite its stability, the adapter remains very light.

Easy: One-handed operation thanks to improved sleeve contour and ball locking system.

Clean: Smooth surfaces for easy cleaning.

Efficient: High flow capacity for fast, flexible applications.

Compatible: Fits standard quick-connect profiles, ideal for WaterProfi spray nozzle and OSW Garden hose.

Hose Reel

Product information hose reel

Large Capacity: Holds up to 200 feet of hose, allowing you to easily reach remote corners of your garden or backyard.

Durability: Sturdy steel frame: Made of robust steel with a weather-resistant coating and brass fittings that prevent rust and leaks. Reliable even under tough conditions.

Easy Handling: Effortless winding: The non-slip handle makes rolling up the hose simple, prevents tangling, and saves time and effort during storage.

Stable Mobility:

- Tip-resistant: The low center of gravity prevents tipping over.
- Sturdy wheels: Two durable wheels ensure smooth movement on various surfaces, including uneven ground.

Versatility: Perfect for a wide range of uses such as watering plants, lawn care, agricultural applications, vehicle cleaning, and other outdoor activities.
